NFW + c-M prior: better in 88 of 132
NFW + c-M + stellar-to-halo prior: better in 82 of 132
Burkert: better in 98 of 132
form S, universal a_{acc}: better in 64 of 132
(a)
galaxies
per-galaxy ΔBIC against the universal RAR (clipped at ±80)
NFW + $\sqrt{g_{bar}A}$
NFW + constant A
NFW, cosmological + $\sqrt{g_{bar}A}$
NFW, cosmological + constant A
Burkert + $\sqrt{g_{bar}A}$
Burkert + constant A
(b) halos refitted at every A
$\Delta(-2\ln L)$ against the best, summed over galaxies
95%
(one-sided)
constant alone
form B alone
amplitude A of the universal term [m s^{-2}]
